To
The Honourable Home Secretary of India,
Office of the Home Secretary,
North Block, Central Secretariat,
New Delhi,
Delhi 110001
e-mail : hshso@nic.in

In the notification issued on dated 16.11.2016, Ministry of Environment, Forest & Climate Change, (Survey and utilization Division), Resolution, New Delhi, 11th November 2016 S.O. 3456(E) --- In compliance of direction contained in the order dated October 5th 2015 of the Hon'ble Supreme Court of India in Writ Petition (Civil) No. 202 of 1995 in the matter of T.N. Godavarman Thirumulpad versus Union of India and others, Ministry of Environment, Forest and Climate Change, Government of India is pleased to make the following guidelines and MOEF SU Division Letter dated 24.11.2016 Gazzate Notification of Wood based industries (establishment and regulation) guidelines 2016, - Regarding

In page No.15, Annexure I Dr. Rekha Pai, Inspector General of Forests --- (Enclosed with this petition)

"The Indian Plywood Industry Research and Training Institute (IPIRTI), Bangalore an autonomous body under the Ministry of Environment, Forest and Climate Change has assessed the timber requirement per unit for peeling length of 4 feet and 8 feet size in the plywood / veneer units as 5 cu.mt. and 11 cu.mt. respectively per day on an average of 8 working hours per day. By assuming that the peeling units work for 8 hours per day on an average for 300 days in a year, the normal timber requirement of the peeling length of 4-feet size in veneer units is 1500 cu.mt. The total timber requirement for the stand alone veneer units may be assessed by calculating the equivalent number of 4 feet length machines and by taking its normal installed capacity as 1500 cu.mt. per annum.

The timber requirement of a plywood unit may be taken as 'nil' on the ground that the round timber is used as timber in the veneer units only and that the plywood units are the secondary users which use the veneer as the raw material produced by the veneer units. The plywood units use presses of various sizes such as 8x4x6, 8x4x12, 8x4x15, 4x4x7, 4x4x10. A 8x4x10 capacity press can produce upto 10 plywood pieces of 8'x4' size per hour whereas a 8x4x15 capacity press can produce upto 15 plywood pieces of 8'x4' size per hour and so on. The normative installed capacity of the plywood units will accordingly depend upon the number and the type of presses. This number and type of presses installed in each of the plywood unit may be assessed and thereafter equivalent number or presses of 8x4x10 capacity may be calculated. The normative annual timber requirement for a integrated plywood unit having a 8x4x10 capacity press may be taken as 2000 cu.mt. per annum, and accordingly the total requirement of timber for the plywood units should be calculated."

It is wrong or willfully omitted the guideline for Saw mill industries using wooden logs only.

The chairman, State level committee (for wood based industries) cum The principal Chief conservator of forests, Tamilnadu is contemplating to issue to grant license to Saw mill industries based on the guidelines reproduced above which is an act of ultra virus.

As such I need the name and address of the officials with all particulars for sue a suit contempt of Court

- 1) The Secretary, MOEF(CC), New Delhi
- 2) The Inspector General, MOEF(CC), New Delhi
- 3) The Deputy Inspector General, MOEF(CC), New Delhi

Early reply is awaited.

I have enclosed a Postal Order in favour of The P.A.O. Office of the MOEF(CC), New Delhi, of Rs. 100/- for producing the above Information.

Postal Order No : 56H 786026

Date : 30.12.2020

Place : Puduchery

Date : 30.12.2020

Yours truly,

(R. Rajasekaran)
